

Evidencia 1151076_AE2_CD1_I1

A partir de la descripción de un problema, se identifican los requerimientos que la aplicación debe cumplir y con base en los requerimientos se identifican todas las funcionalidades.

Identificación de Funcionalidades y Pantallas

Pantalla de inicio de sesión

- Dos elementos de texto para ingresar usuario y contraseña respectivamente.
- Botón para verificar credenciales e iniciar sesión, para posteriormente llevar la siguiente pantalla.

Pantalla Principal (Inscripción)

Con tres pestañas (Inscripción, Consultar Inscripción y dar de Baja)

La pantalla Inscripción será la que se muestre por omisión.

Pantalla Inscripción

Contendrá:

- 8 elementos de texto para los campos: Nombre, Primer Apellido, Segundo Apellido, Edad, Género Dirección, Teléfono, Teléfono en caso de emergencia.
- Label para indicarle al usuario a que corresponde cada campo de texto.
- ComboBox que desplegara la lista de los Talleres disponibles para inscripción, al seleccionarla en la pantalla horarios se deben mostrar los horarios correspondientes al taller.
- Boton Agregar taller.
- Par de Botones radiales con las opciones Adquirir material o no para el taller.
- Checkboxes agrupados que mientras no se seleccione el botón radial adquirir material se mantendrán ocultos. Al seleccionar el botón radial adquirir material se mostrar con un checkbox el material opcional disponible según el taller que se haya seleccionado en el comboBox.
- Tabla: mostrara los talleres agregados y el costo de cada uno de ellos, junto con los materiales si es que se desean adquirir con su costo.
- Botón para registrar: deberá verificar que todos los campos obligatorios estén llenos y registrará todos los talleres agregados.

Se proponen las pantallas necesarias para cubrir todas las funcionalidades requeridas.

Pantalla de horarios

Mostrará los horarios disponibles para el taller seleccionado en el comboBox de la pantalla registrar

- Tabla con los horarios disponibles para el taller indicando el nombre del taller.

Pantalla consultar Inscripción

Contendrá:

- 2 elementos de texto para ingresar el nombre o ID asignado por la escuela de artes visuales del alumno inscrito a buscar.
- 2 label para indicar que campo corresponde a nombre y cual a ID.
- Botón consultar que verificará la información en la base de datos, en caso de no haber coincidencias con los datos de búsqueda se mostrará un cuadro de dialogo indicando que no se ha encontrado la información del estudiante buscado.
- Tabla que se mantendrá oculta a menos de que haya una ocurrencia con los datos de búsqueda, los cuales mostrará en la misma.

Pantalla Dar de baja

El sistema verificara que se haya iniciado sesión con una cuenta de administrador, de no ser el caso esta pantalla solo mostrara un label que indique que la operación dar de baja solo la puede realizar el encargado del sistema.

En caso contrario mostrará los siguientes elementos:

- Dos elementos de texto para ingresar el nombre ó el Id del alumno a dar de baja.
- Dos label para indicar a que corresponde cada campo de texto.
- Tabla que mostrará los datos del alumno que será dado de baja.
- Botón dar de baja que eliminara de la base de datos al alumno mostrado en la tabla.

Pantalla dar de alta empleado.

Solo disponible para el administrador del sistema, en la cual podrá asignar nombres de usuario y contraseñas para el personal de la escuela de artes visuales que usarán el sistema de registro. Contendrá:

- 4 Campos de texto para ingresar nombre del empleado, número de empleado, usuario y contraseña.
- 4 Label para identificar a que corresponde cada campo de texto.
- Botón Registrar empleado que registrara a las cuentas autorizadas para usar el sistema.

- Se identifican los elementos de control (Etiquetas, Botones, Botones radiales, Casillas de verificación, Cajas de Texto, Bloques o áreas de Texto, Listas de Selección, Listas de opciones, elementos cíclicos –*spinners*, *sliders*) de la interfaz que deberán incluirse en cada una de las pantallas. Los elementos de control fueron conceptos vistos en clase, explicando su funcionamiento.

- Se implementan las pantallas con cada uno de los elementos de control necesarios siguiendo los principios de despliegue (tamaño, alineación, repetición, proximidad, color, contraste), para crear una estructura con jerarquía visual (concepto visto en clase). Sólo determinados elementos reaccionan a eventos internos (sistema) o externos (destinados a la interacción con el usuario). Los eventos internos y externo fueron conceptos definidos y explicada su funcionalidad en el diseño de interfaces gráficas de usuario.

- Se implementa la navegación de las pantallas utilizando uno de las técnicas vistas en clase (pestañas, menú o botones), acorde con la funcionalidad requerida.
